Premiera Blue Cross breached, medical information exposed

BOSTON | BY JIM FINKLE

(Reuters) - Health insurer Premiera Blue Cross said on Tuesday it was a victim of a cyberattack that may have exposed medical data and financial information of 11 million customers in the latest serious breach disclosed by a healthcare company.

It said the attackers may have gained access to claims data, including clinical information, along with banking account numbers, Social Security numbers, birth dates and other data in an attack that began in May 2014.

It is the largest breach reported to date involving patient medical information, according to Dave Kennedy, an expert in healthcare security who is chief executive of TrustedSEC LLC.

About 6 million of the people whose accounts were accessed are residents of Washington

Plaintiffs have also plausibly alleged that Target's conduct both caused and exacerbated the harm they suffered."
